Subject: 3 Sept 2017 -- ASPECT update 3 -- 1035
Date: Sunday, September 3, 2017 11:11:05 AM

The ASPECT team in Addison is moving back to the company hanger. We have a super-fast connect established so that solves one problem. We are currently uploading data from Hobby so I think we are recovering and should be back running full by 1200.

ASPECT has flown the Arkema site and detected very low levels of periodic emissions, most likely residual from last night. We are looking at the most recent IR and will provide an image in the near future.
